

ENESTVEDT'S

Hybrid Seed Corn

**Take the road to Enestvedt's . . .
THE WAY TO BETTER YIELDS**

BENEFITS OF NEW SEED

- ★ **LATEST TECHNOLOGY:** Highest yielding soybean technology available. Six soybean trait products anticipated to come from Monsanto in the next 2-7 years. (Pending regulatory approvals)
- ★ **CUSTOMER SERVICE:** Dealer agronomic support before and after the sale. Replant policy support. Convenient packaging and delivery.
- ★ **RELIABLE GERMINATION AND QUALITY:** Rigorously tested for quality and meets US Federal Seed Act requirements. Free of seed borne diseases. Properly stored and conditioned.

PRODUCT GUIDE

- ★ We produce and process most of the varieties listed in this brochure.
- ★ Long standing member of the Minnesota Crop Improvement Association.
- ★ Our corn is dried, graded and treated in our processing plant according to uniform and proven standards.
- ★ A variety to fit every farm.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® 2 Technology contain genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate.

CORN PRODUCTS: South Central Zone

E-520 Conventional108 Day Maturity

Leading hybrid in its maturity. Impressive stalk and root strength, exceptional stay green and late season intactness. Medium tall with erect leaf canopy. Excellent corn on corn, Goss's wilt and northern leaf blight. Girthy ear with very good earflex. Plant at high populations. Limited supply.

E-598 Conventional107 Day Maturity

Outstanding top end yielding hybrid. Medium tall plant with strong stalks and roots with lower greensnap risk. Very good disease tolerance including Goss's Wilt. Very good drought tolerance and fungicide response. Good Earflex and Eargirth. Medium high to high population.

NEW! E-541 Conventional106-Day Maturity

Medium tall hybrid with very good stalk and root ratings. Good tolerance to Northern Leaf Blight and Goss's Wilt. Girthy ear with 18-22 rows and very deep kernels. Very good corn after corn, drought tolerance and fungicide response. Average test weight

E-539 Conventional103-Day Maturity

Medium tall plant with very good stalks and roots. Semiflex Ear type with long ears and good kernel depth with good test weight. Excellent early vigor and very good disease and Goss ratings. Population tolerance medium - medium high. Corn on corn recommended with fungicide. ASR hybrid anthracnose resistance. Limited supply

SmartStax[®] E-539 SSRIB103-Day Maturity

Smartstack Hybrid. Description Above

VT Double PRO[®] E-539 Double ProRIB103-Day Maturity

Same as above hybrid with Roundup Ready and corn borer resistance.

Roundup Ready² E-539 RR103-Day Maturity

Roundup Ready Hybrid

CORN PRODUCTS: Central Zone

SmartStax[®] E-696 SSRIB100-Day Maturity

Excellent top end yield with strong agronomics. Excellent roots with very good stalks and greensnap tolerance. Very good drought tolerance. Semi determinate ear. Medium plant and ear height. Population tolerance 32-38.

Roundup Ready² E-696 RR100 Day Maturity

Glyphosate tolerant hybrid. Description above.

E-696 Conventional100-Day Maturity

Conventional version of hybrid. Description above.

VT Double PRO[®] E-699 Double ProRIB 99-Day Maturity

Tall hybrid with very good stalks and good roots. Very good early plant vigor and good drought tolerance. Good on Goss's wilt and stalk anthracnose. Excellent upper end yield potential with high management. Semiflex ear with medium to medium high population recommended. Roundup Ready with corn borer resistance refuge in bag. ASR hybrid anthracnose resistance.

E699 Conventional99-Day Maturity

Limited Supply. Description above.

E-588 Conventional98-Day Maturity

Shorter plant type hybrid with very good stalk and roots. Average test weight with excellent dry down. Excellent yield potential and fall intactness. Population recommended medium high to high. Good on all soil types.

VT Double PRO[®] E-600 Double ProRIB99-Day Maturity

An ASR hybrid with very strong yield potential east to west. Semiflex ear with good stress tolerance. Good stalk rating with very good root rating. Good on greensnap, drought tolerance, and plant intactness. Very good early plant vigor. Excellent drydown. Not recommended corn on corn. Population tolerance medium to medium high. Limited supply.

E-670 Conventional100-Day Maturity

A hybrid with dominant yield. Very good stalk and root ratings. Girthy ear with very good ear flex. Medium plant and ear height. Excellent fungicide response but average corn on corn. Average drought tolerance and dry down. Population tolerance medium to medium high 30-34. Limited Supply

E-690 Conventional98-Day Maturity

Hybrid with outstanding appearance and very good Goss tolerance. Very good stalk and root ratings. Excellent seedling vigor and test weight. Very good earflex and good drydown. Plant at medium high populations. Limited supply.

SmartStax[®] E-660 SSRIB97-Day Maturity

Excellent yield potential in robust plant. Medium tall plant with medium ear height. Very good stalk with good roots. Very good disease ratings and greensnap tolerance. Corn on corn recommended. Good early plant vigor with average drought tolerance. ASR hybrid anthracnose resistance. Limited supply.

E-658 Conventional96-Day Maturity

Semiflex ear type with very good drought tolerance. Excellent top end yield across most soil types. Very good stalks and excellent roots aid late season standability. Very good emergence and excellent early vigor for reduced tillage and early planting. Very good disease package with good Goss's wilt. ASR hybrid anthracnose resistance.

VT Double PRO[®] E-658 Double ProRIB96-Day Maturity

Same as above hybrid with Roundup Ready and corn borer resistance.

E-648 Conventional96-Day Maturity

Excellent performing hybrid across all soil types. Impressive stalk and root strength. Very good ear flex and length. Medium tall plant with medium ear height. Very good Goss's wilt and GLS tolerance. Plant at medium to high populations. Very good corn on corn ratings.

Roundup Ready² E-648 RR96-Day Maturity

Roundup Ready Hybrid

E-652 Conventional95-Day Maturity

Medium height, very high yielding hybrid. Very good drought and greensnap tolerance. Excellent disease package with good Goss's wilt tolerance. Very good test weight, stalk and root ratings. Plant at 30-34 thousand. Semi determinate ear.

VT Double PRO[®] E-652 Double ProRIB95-Day Maturity

Same as above hybrid with Roundup Ready and corn borer resistance.

Roundup Ready² E-652 RR95-Day Maturity

Same as above hybrid with Roundup Ready only. Limited supply.

E-646 Conventional94-Day Maturity

Racehorse hybrid with excellent defensive characteristics. Moderate earflex. Performs best at higher populations. Excellent seedling vigor with very good stalk and roots. Medium tall with medium ear height.

NEW! E-621 Conventional94-Day Maturity

New hybrid with top end yield potential. Medium tall hybrid with very good seedling vigor. Girthy flex style ears with good grain quality. Very good stay green and plant intactness. Very good stalk and root ratings. High population tolerance. Limited supply.

VT Double PRO[®] E-640 Double ProRIB94-Day Maturity

An ASR hybrid with good agronomics and western movement. Best positioned on well drained soils. Semiflex ear enables lower plant populations. Good stalk rating with very good root ratings. Medium plant and ear height. Very good on greensnap, test weight and plant intactness. Average corn on corn. Population tolerance medium to medium high. Limited supply.

CORN PRODUCTS: North Central Zone

E-612 Conventional92-Day Maturity
Outstanding yielding hybrid with fast drydown. Widely adapted across varying environments. Very good early vigor with good stress tolerance. Good stalk with very good roots. Medium tall plant with medium ear height. Above average drought tolerance. Excellent high population tolerance.

E-612 RR.....92-Day Maturity
Same as above hybrid with glyphosate tolerance.

CORN PRODUCTS: Northern Zone

E-878 Double ProRIB.....87-Day Maturity
Excellent early vigor for northern adaptation. Very strong yield performance. Good hybrid for less productive and tough acres. Medium tall with very good stalk and good roots. Very good ear flex and dry down. Very good drought tolerance and fungicide response. Takes high populations.

E-843 RR.....85-Day Maturity
Outstanding top-end yield potential with fast dry-down. Excellent late season stay-green and intactness. Widely adaptable with good southern movement. Exceptional stalk and root strength for maturity. Above average drought tolerance.

E-859 Conventional85-Day Maturity
Attractive medium tall plant with medium ear placement. Excellent top end yield potential for productive and variable yield environments. Very good early vigor, stalk and root ratings. Girthy ear, semideterminate. Medium high population tolerance. Not recommended for corn on corn.

SOYBEAN PRODUCTS

Complete line of Enlist-E3 soybeans
available for 2022

WHEAT/OAT PRODUCTS

Lang Wheat

Spring wheat with very good yield, quality, and disease resistance. It has very good scab resistance ratings and excellent resistance to leaf and stripe rust and moderate resistance to bacterial leaf streak. High protein with medium maturity and medium straw strength.

Pearl Oats

A white hulled variety with high yield and good straw strength. Medium tall with good test weight. Pearl has smut resistance and has moderate crown rust resistance.

Enestvedt Seeds

Celebrating 122 Years of Service

2022 marks the 122nd Anniversary of Enestvedt Seeds. Three generations of the Enestvedt Family have made Enestvedt Seeds what it is today. Enestvedt Seeds is a family-owned and operated seed business in operation today by Roger Enestvedt.

The Enestvedt Seed Corn Company was established in 1900 by E.G. Enestvedt. Enestvedt Seeds office is still located on the farm homesteaded in 1867 by the great-grandfather of Roger and grandfather of Johannes and Bert, Ole Enestvedt.

The University of Minnesota released 13 open pollinated seed corn in 1897. Johannes and Bert's father, E.G. Enestvedt, was attending the St. Paul School of Agriculture at this time, growing and selling seed corn while he was in school. He graduated in 1902, returning to the family farm in the Minnesota River Valley to continue farming and growing seed. In 1908, he married Clara Haug and together they continued the farming-seed business. E.G. passed away in 1923 leaving his wife Clara and their five children. Clara operated the farm with hired help until her sons Odean, Johannes, and Bert were old enough to take over.

The three boys operated the Enestvedt Seed Company together from that point on. Odean passed away in 1988, Johannes in 2012 and Bert in 2015.

Minnesota 13 seed corn was sold by the Enestvedts until they started raising Minhybrids in the mid-1930's. Today the company sells seed corn, soybeans, and other seed grains.

The Enestvedt's tradition of detassling began in the mid-1930's with the coming of hybrid seed corn varieties. Countless numbers of young people have had summer jobs at Enestvedt's. Today, up to 50 young people are still hired for the manual job of detassling every summer.

We produce and process most of the hybrid corn varieties we offer. Our corn is dried, graded, and treated in our processing plant according to uniform and proven standards.
